

## Pole Position

**Duration:** 60 to 180 minutes

**Guest Numbers:** 10 - 200

**Requirements:** Can be run in your dining room or conference room

Re-live your youth and test your racing prowess with these super fast, scaled GT Touring Cars. Racing ahead from the traditional Scalextric of yester year, this sophisticated, purpose built six-lane digital race circuit, with 45 feet of hairpin bends and acceleration straights uses the latest in modern technology.

The track is custom built with sound effects, lighting and hand held controllers. Integrated digital scoring is shown through the race computer enabling guests to view their lap and race times on the trackside monitors. This ensures everyone is involved and builds the tension and excitement with each corner.

In a race requiring skill and accuracy teams are encouraged to work together and support from the sidelines is a must to drive your team to success. Designed to look for the best individual or best team, Pole Position is a versatile event; great for short pre dinner drinks sessions or full after dinner events. The full event lasts approximately two hours and champagne is awarded to the winning team.
