

Drum Circle

Duration:	Up to 60 minutes
Guest Numbers:	Up to 300
Requirements:	Room to fit all guests with instruments. The venue will need to be informed regarding the volume

Using a variety of drums and percussion instruments in no time at all our team will have energy levels soaring, a room full of smiles and your group ready for an experience to be remembered.

Following a briefing and demonstration, guests will be shown the rhythms assigned to each instrument.

Then after a practice and following cues from the conductor, individuals perform their rhythm within the group song.

The message here is important. Each individual plays their own beat whilst working to a group objective.

Then with their rhythm mastered, guests are moved to a different place in the circle and handed a new instrument. It is time to learn a new skill as the group adapts to their changing environment and role.

As the session progresses we highlight how your group copes with change in this high energy, fun and interactive event!
