# Introduction

Like never before there is a need for businesses to communicate, motivate and interact with their audiences...all within a new virtual landscape. There are still excellent ways to clearly convey your messaging, celebrate and reward your delegates in this new technical environment and KDM have many options to help you do just this!

We know you still need Meetings, Seminars, Workshops, Conferences, Awards Ceremonies, Fund Raising Events....and we have a range of solutions available dependant on your budget, style of event, content and speaker's locations.

From completely equipment free packages, to full studio installation at your location or travelling to our permanent studio, there is a high-quality solution to enhance your virtual communications and hybrid event setups.

**kdm**  
communication through events

## PACKAGE A:

### Equipment free, remote meeting management by our AV team

Our team of technicians will co-ordinate all your host and presenter's segments remotely and organise this as a slick show for your audience to interact with.

No need for a stage or studio - your host, speakers and presenters will simply dial in live from their remote locations using their own online web cameras and audio (webcam, laptop, tablets etc). All the different presenter's remote feeds are managed by our AV team who display all the slides, pre-recorded video, visuals and camera feeds as a slick, co-ordinated show running to your organised agenda....as would a face to face meeting! For those segments where pre-recorded messages are needed, our team weave this as part of the overall agenda and switch to those seamlessly as part of the show. This is a great and easy way to add in keynote/guest speakers, winner's speeches and sponsor announcements!

Events can be hosted on your preferred platform such as:

Or also as part of your own company website!

Your guests will each dial in using a secure and password protected log in and can interact with those parts of the meeting where you'd like questions, comments and feedback by using our Slido software if needed.

#### Option Upgrades:

- Add Slido to your options to enable guest live interaction – price available on request.
- Add Show Production and Design to ensure your content is interesting, dynamic and maintains engagement. For example, animated banners across the bottom of the screen announcing presenters, alongside slide templates, presenter backdrops, graphics and overlays. Contact us for suggestions!
- Add professional remote studio and/or recording video equipment and technicians at some/all of your presenter's locations. Contact us for details and a specific location-based quotation.

**Package A: from £2,600 plus VAT**

## PACKAGE B: Existing Studio in our permanent location

A mid-price range option is for your presenters to travel to our permanent studio. All equipment is already built into this location where all secure parking, green rooms, cleaning protocols and hand sanitizer stations are part of the standard Covid-secure venue requirements.

This is managed in exactly the same way as a remote Studio package with all content seamlessly knitted together by our team and broadcast online for your audiences to watch.

### Option Upgrades:

- Add Slido to your options to enable guest live interaction – price available on request.
- Add Show Production and Design to ensure your content is interesting, dynamic and maintains engagement. For example, animated banners across the bottom of the screen announcing presenters, alongside slide templates, presenter backdrops, graphics and overlays. Contact us for suggestions!

**Package B:** from £7,500 plus VAT

## PACKAGE C:

### Full remote studio in your preferred location

Using the same technical know-how, our AV team will install a remote studio in a location of your choosing – either at your premises or in an offsite local venue. Here your event hosts and presenters will take to the stage in a socially distanced and secure managed manner to present to your audiences as a live broadcast.

As usual, our AV team co-ordinate all your content, pre-recorded video, live host and presenter segments into a seamless show for your audience to interact with online. All AV teams wear facemasks, hand sanitizer stations are in use and teams are temperature checked each day before leaving to be part of our event crews.

The size of studio will be built around your number of presenters, format and the spaces available at your preferred location. We advise on every step of the process and make sure that every detail is considered as we suggest all the different and best options for you.

Events can be hosted on your preferred platform such as:

Or also as part of your own company website!

Your guests will each dial in using a secure and password protected log in and can interact with those parts of the meeting where you'd like questions, comments and feedback by using our Slido software.

#### Option Upgrades:

- **Make your event Hybrid** by adding a small live audience to watch the event in the studio along with the remote online audience. Contact us to discuss options for your event.
- **Add Slido** to your options to enable guest live interaction – price available on request.
- **Add Show Production and Design** to ensure your content is interesting, dynamic and maintains engagement. For example, animated banners across the bottom of the screen announcing presenters, alongside slide templates, presenter backdrops, graphics and overlays. Contact us for suggestions!

**Package C: from £8,500 plus VAT**
